Year of Passing	2020
Percentage	84.8%

PROJECTS

AI-interview-app, June 2026 - June 2026

- Developed a production-ready AI Interview Practice Platform using FastAPI, PostgreSQL, SQLAlchemy, Redis, and Docker. Implemented secure JWT authentication, role-based access control, AI-assisted interview evaluation, analytics dashboards, PDF report generation, and REST APIs following Clean Architecture principles.

GitHub:<https://github.com/Yugdipgadpayle/ai-interview-platform>

AI-Resume-Analyzer, June 2026 - June 2026

- Developed a production-ready AI Resume Analyzer using React.js, FastAPI, PostgreSQL, and SQLAlchemy. Implemented ATS scoring based on skills, keywords, experience, and education. Built secure JWT authentication, resume parsing for PDF/DOCX/TXT files, dashboard analytics, cover letter generation, and PDF report downloads. Containerized the backend using Docker and integrated PostgreSQL for data management.

GitHub:<https://github.com/Yugdipgadpayle/Resume-Analyzer>

Ai-Movie-recommendation, March 2026 - March 2026

- Developed a responsive movie browsing application using React.js and modern frontend development practices. Implemented reusable React components and dynamic content rendering.

Designed responsive user interfaces optimized for multiple screen sizes.

Utilized Vite to streamline development workflows and improve build performance.
